ALL AMERICAN 1930

Cover Handle
Replacement Instructions

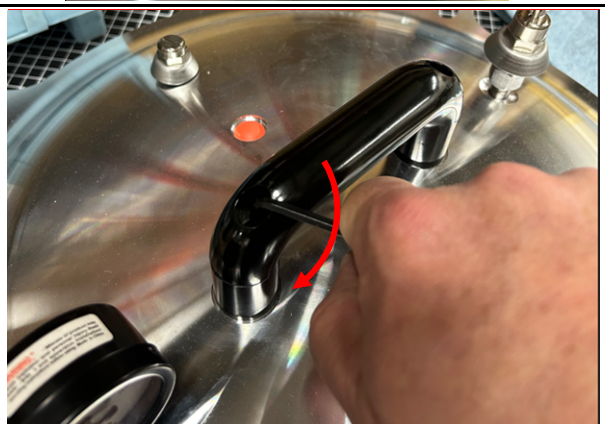

Part Name	Cover Handle	Part Number	76-09/ 77-09

Instruction Details	Photos/ Images
Tools Needed: 5/32 Allen Wrench Penetrating Oil	
Removal Instructions 1. Apply a little penetrating oil at the top of the handle in the hole where the screw is located and at the base where the screw goes into the cover. Let this soak in for at least 10 minutes.	
2. Using a 5/32 allen wrench turn screw out counterclockwise to remove. Repeat for the second screw. Remove handle.	
Installation Instructions 3. Place new handle on cover and insert screws into the holes in the handle.

4. Insert the allen wrench into the screw and begin to turn the screw clockwise into the threads in the cover. You may need to wiggle screw around a little until you find the threads.	
5. Tighten screws until snug. Do not over tighten or the handle could possibly break.
